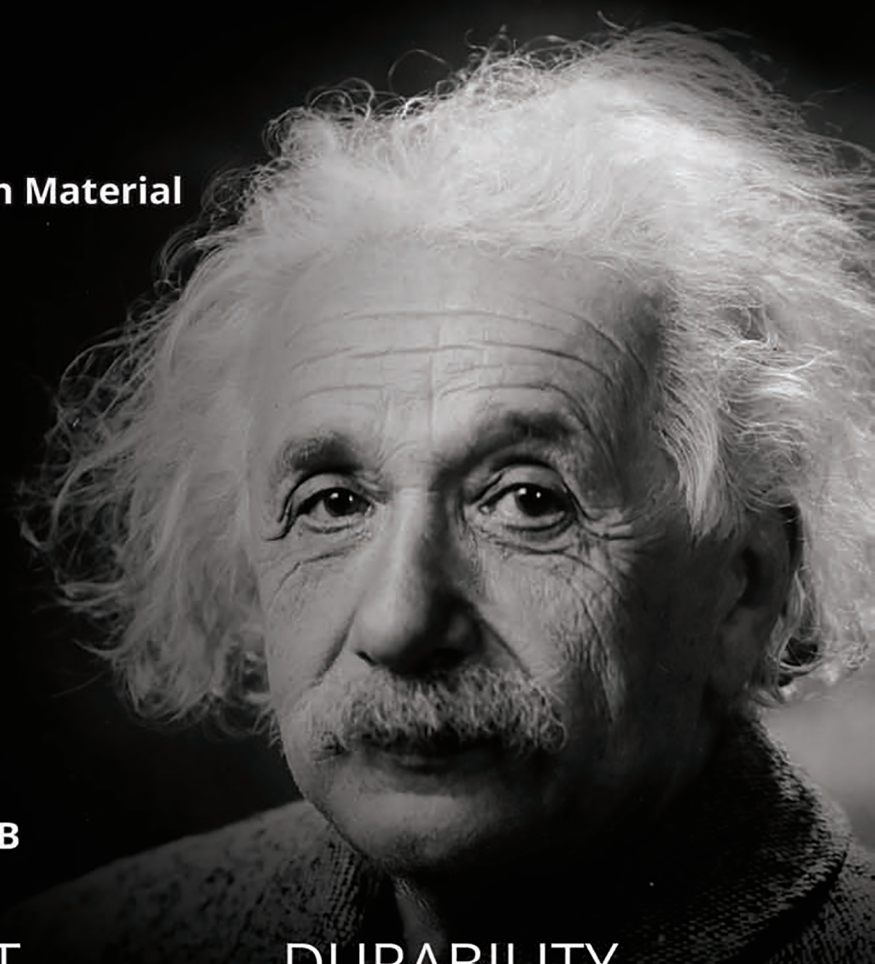
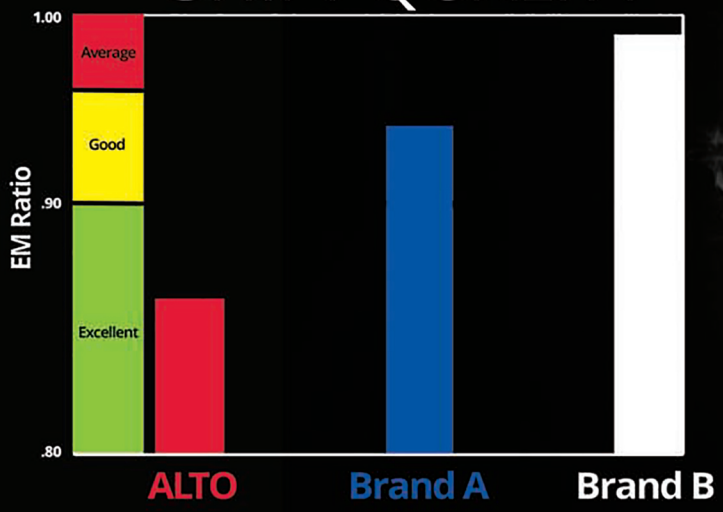
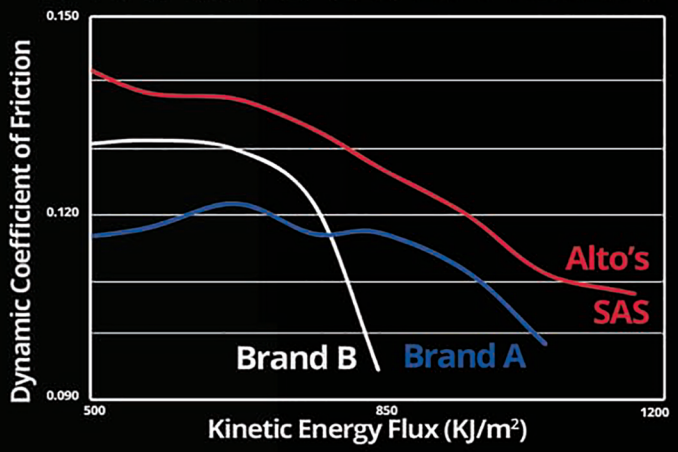
Alto Revolutionizes Honda Friction Material



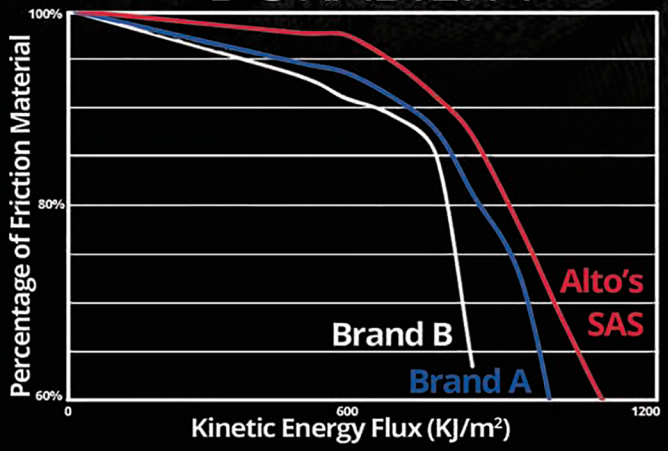
SHIFT QUALITY



DYNAMIC COEFFICIENT



DURABILITY



SAS Friction Material

Superior Shift: 8% shift improvement over Brand A and 12% improvement over Brand B

Superior Durability: 9% capacity advantage over Brand A and 20% over Brand B

Superior Torque: 5% greater torque than Brand A and 14% more than Brand B

Temp-eramental Hyundai

I was handling a call on the ATSG Tech Line about a 2000 Hyundai Elantra that had a complaint of a flare on the 2-3 shift.

Ordinarily, a KM unit with a 2-3 flare could have a problem with servo-release pressure, usually caused by the computer not shutting off the pressure-control solenoid quickly enough. There could be a problem with the servo switch if it were stuck. In other words, these are the usual components that could cause a 2-3 flare on a KM unit.

In this situation it was none of the usual items. It was, believe it or not, the transmission-fluid-temperature sensor. As I looked further into this, sure enough, I found factory bulletin 00-40-010 dated August 2000.

It seems that this vehicle had stored a P0712 for a shorted ATF-temp sensor, which causes the TCM to create a flared 2-3 shift in this vehicle model. Computer strategy seems to be the culprit here.

As I read the bulletin, I found other unusual computer strategies in play on various Hyundai model years, all related to the ATF-temp sensor and in what manner it failed.

If the ATF-temp sensor fails open and stores code P0713, the complaint would be a harsh garage shift from park to either drive or reverse and no converter-clutch application.

If the vehicle were a 1996-2000 Elantra or Tiburon, or a 1995-2001 Accent, the complaint would be no 4th gear.

If this were a 1999-2001 Sonata, the complaint would be no upshift past 2nd gear.

Should the ATF-temp sensor become shorted and a P0712 be stored, the 2-3 flared-shift complaint would affect 1996-2000 Elantra and Tiburon as well as 1995-2001 Accent.

In the event this happens to you, the part number of the ATF-temp sensor for the 1996-2000 Elantra and Tiburon and for the 1995-2001 Accent is 46386-22600.

The part number for the 1999-2001 Sonata is 46386-39050. TD

Technical Bulletin #638

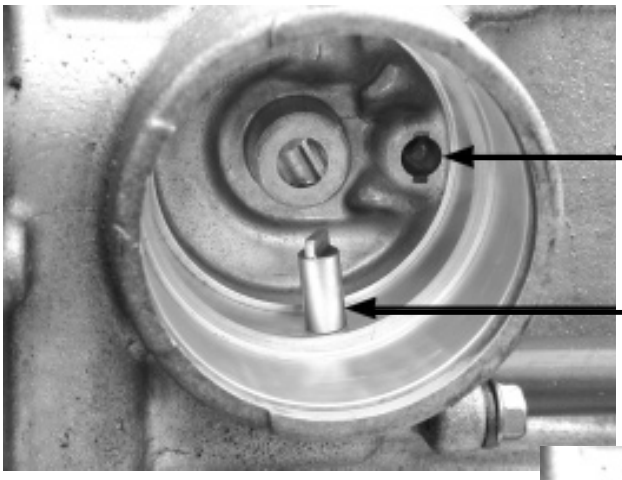
- Transmission: F3A
- Subject: Slips in 3rd/Reverse , no 3rd/ reverse, missing plug in servo bore
- Application: Ford Aspire

August 2001

F3A

Slips in 3rd/Reverse, No 3rd/Reverse, Missing Plug in Servo Bore

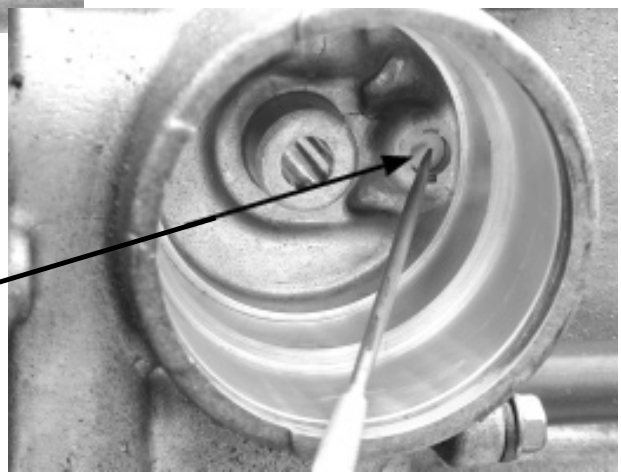
Ford Aspire vehicles with an F3A transmission have a steel plug in the case inside of the servo bore. This plug is staked in at the factory, and often falls out of it's hole when the servo is disassembled. If this plug falls out and the hole is not plugged, front clutch/servo release oil will be exhausted and the result is a 3rd/reverse slip, or no 3rd/reverse. It is not critical that this specific plug be reinstalled, but the hole must be plugged off.



This hole must be plugged.

Plug/Pin

Approximate Plug Dimensions
.313" Diameter
.728" Overall Length
.078" Flatted End Thickness



The factory installed the flatted end in first (The end that resembles a flat blade screw driver).

NOTE: This part is not serviced by Ford.

Technical Bulletin #350

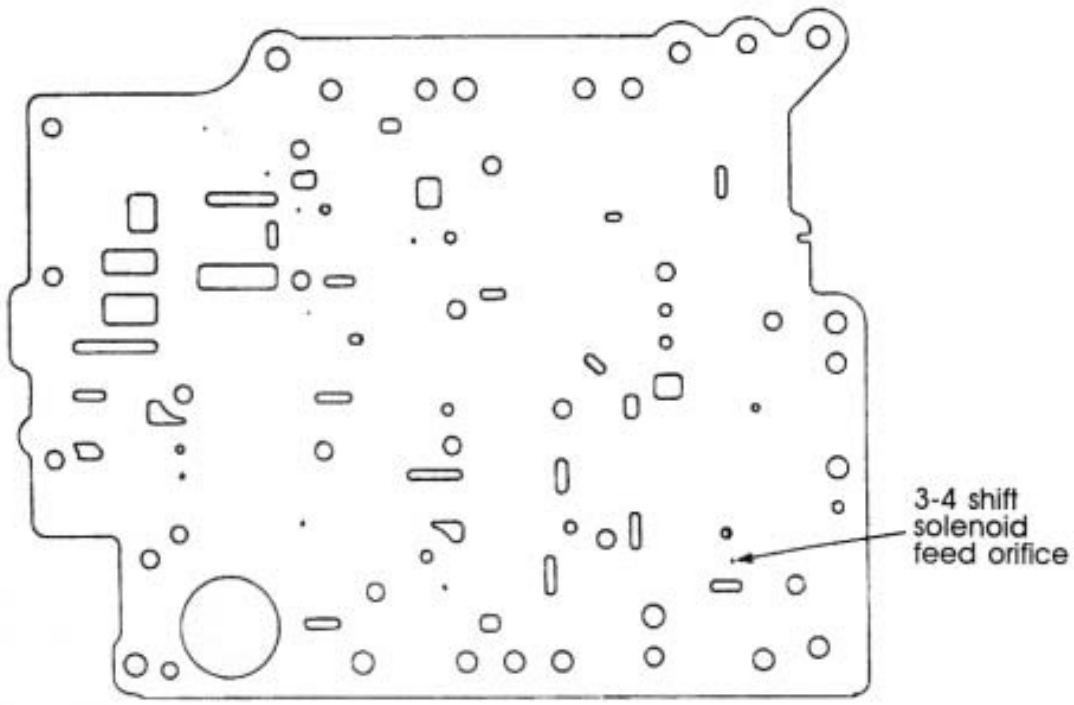
Transmission: *G4A-EL*
Subject: *3-4 Shift hunt*
Application: *Ford, Mazda*
Issue Date: *August, 2003*

G4A-EL

3-4 Shift Hunt

This condition may be caused by failure in the 3-4 shift solenoid hydraulic circuit. Monitor the shift solenoid signals from the computer. If the 1-2 shift solenoid is the only solenoid being cycled on and off during the 3-4 shift hunt, the 3-4 shift solenoid feed circuit has failed.

This condition is commonly caused by debris which has plugged the 3-4 shift solenoid feed orifice.



NOTE: This condition may also be caused by a leak in the 3-4 shift solenoid or the end plug of the 3-4 shift valve.

Technical Bulletin #393

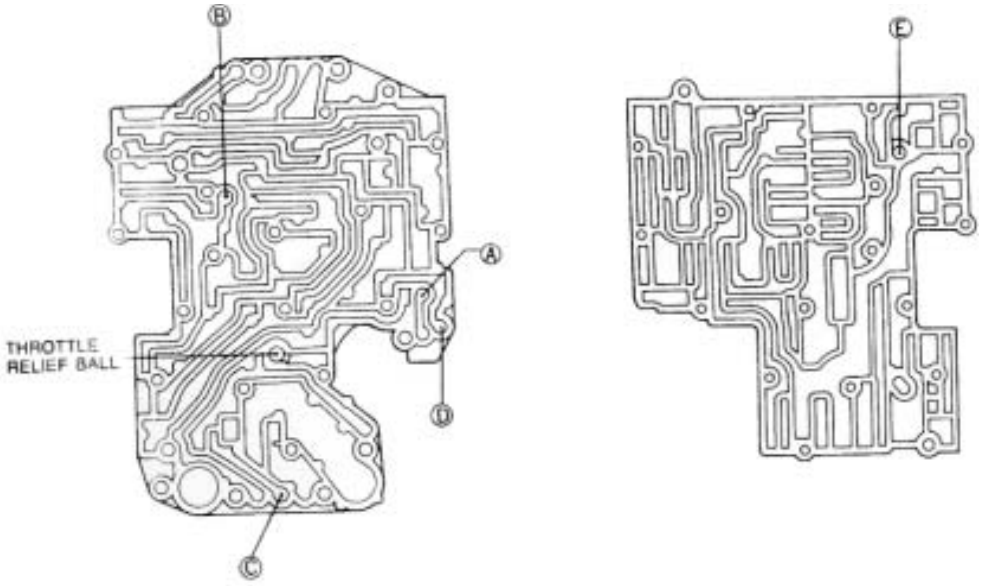
Transmission: *3N71B, 4N71B, M41*
Subject: *Orifice locations*
Application: *Nissan, Mazda, Dodge, Mitsubishi, Subaru*
Issue Date: *1996*

3N71B, 4N71B, M41

Orifice Locations

The following illustration shows the location and size of the various orifices used in these transmissions.

NOTE: Not all units use all of the orifices shown.



Orifice	Function	Observed Sizes
A	Meters intermediate servo release oil during a 3-2 downshift	.047", .051", .059", .067"
B	Meters oil to the direct clutch for 3rd gear	.059"
C	Meters forward clutch oil for engagement feel into drive	.070", .079"
D	Meters line oil to the overdrive direct clutch and release side of the OD server during a 4-3 downshift	.079", .087"
E	Meters the direct clutch for reverse engagement (does not use a spring)	.079", .087

Saturn TAAT

Delay in 'D' and/or Bind in Reverse

Complaint:

Before or after overhaul, Saturn vehicles equipped with the MP6 or MP7 transaxle may exhibit a slight engagement delay in "D" and/or a binding condition in reverse.

Cause:

The cause may be shrunken or damaged 1st-clutch sealing rings, as shown in Figure 6. When these rings leak they can cause a slow fill of the 1st clutch, which results in a delayed engagement in "D." The first sealing ring also separates the 2nd clutch from the 1st clutch. When this ring leaks while in the Reverse range, the 1st clutch can now be applied with 2nd-clutch pressure, which results in a bind-up. See Figure 7 for a cross-sectional view of the mainshaft.

Correction:

Replace the 1st-clutch sealing rings as part of every overhaul. TD

Figure 6 Location of 1st-Clutch Sealing Rings

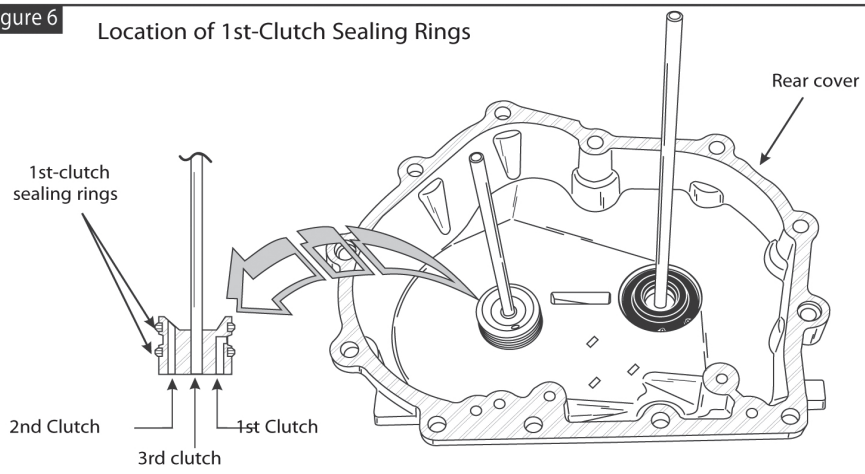

Figure 7 Cross-Sectional View of Mainshaft

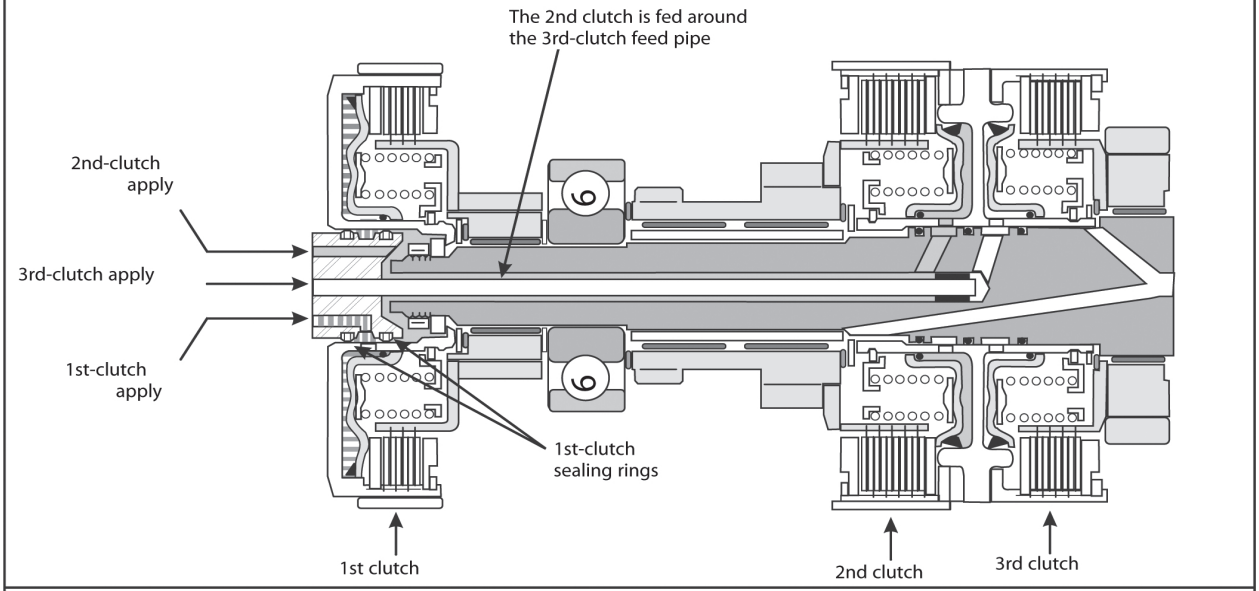

Summary: When the 2nd clutch is applied in Reverse, shrunken 1st-clutch sealing rings may allow the 1st clutch to be applied at the same time, causing a bind-up.

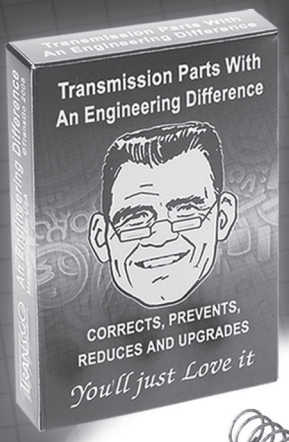
5HP-19-PR

Pressure Regulator Repair

Corrects/Prevents/Reduces:

Extreme Pressure Damage Due To Worn PR Bore, Harsh Shifts, Kick-Down Bang, Drum Breakage.

Patent Pending



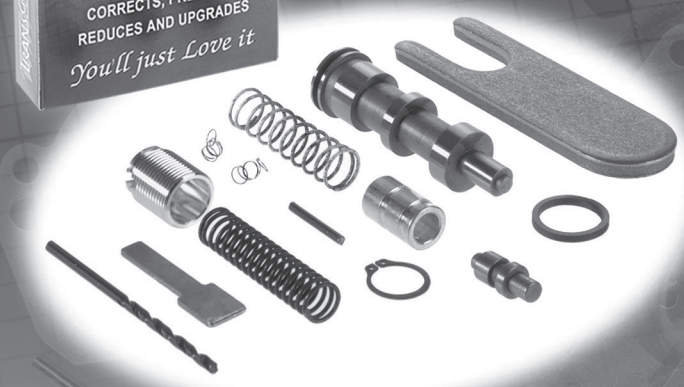
SK® VW-01M

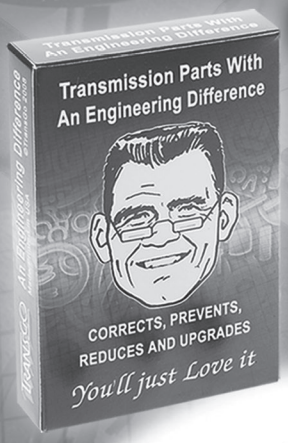
Corrects/Prevents/Reduces:

Kills Engine, Rough Lockup, Soft 1-2, 2-3 Cutloose, Excessive or Runaway Pressure. Solves worn Pressure Regulator Bore issue without Tools.

Fits:

1995-2004 Volkswagen 0IM





5HP-24-PR

Pressure Regulator Repair

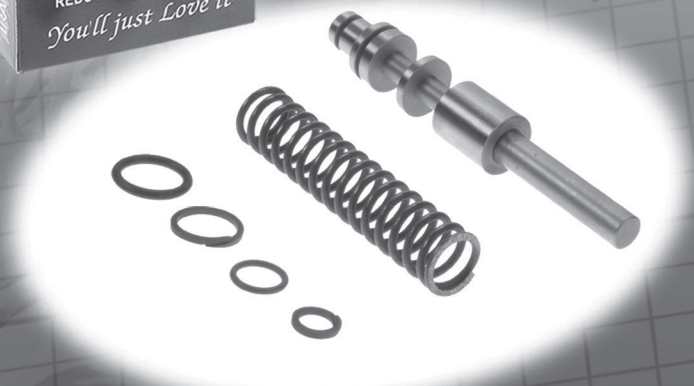
Corrects/Prevents/Reduces:

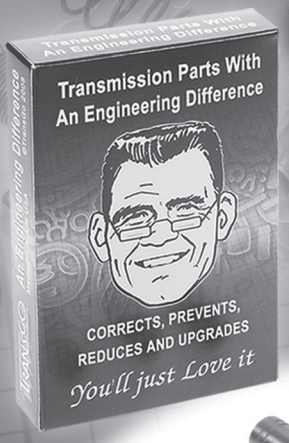
Runaway Pressure, Harsh Shifts, Kick-Down Bang, Drum Breakage.

Fits:

ZF5HP-24 Equipped Audi, BMW, Jaguar and Range Rover Vehicles.

No special tools required!





SK® 4F27E

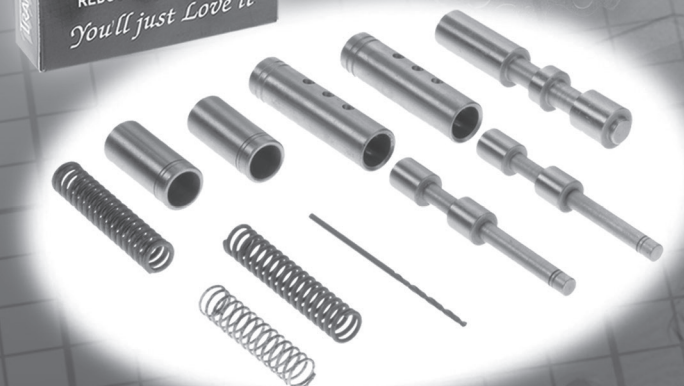
Corrects/Prevents/Reduces:

Wrong gear starts. No 2nd gear, Skips 2nd. KD Neutrals at speed, TCC Slip Codes.

Fits:

2000-2010 4speed Ford 4F27E & Mazda FN4A-EL

2006-2010 5speed Ford FNR5 & Mazda FS5A-EL



It just ain't FIXED *without it!*

SUPERIOR Innovation
Simple 5R110W Solutions

NOW AVAILABLE: 2 Superior 5R110W Pump Upgrade Kits

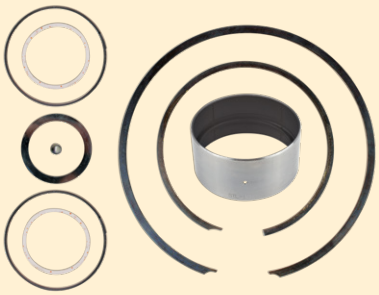
The "Original" part # STL-5R110W Pump Upgrade Kit and the NEW part # STL-5R110W-OS for oversized* P.R. bore both with Patent Pending Sure-Cool® Flow~Control Technology
*Part # STL-5R110W-OS (fits approx. bore size .768")

TransLab Engineered® 5R110W Sure-Cool® Flow~Control System replaces the failing OEM Thermal Bypass and provides full time cooler flow while achieving much lower average fluid temperatures via our patent pending and proprietary Flow~Teck® flow calibration system. Built-in high pressure safety bypasses into the lube circuit (if restricted) thus saving critical parts on meltdown due to cooler/flow blockage. Moreover immediate cooler flow allows an accurate ATF level check w/o warm-up and it SAVES TECHNICIANS wait time to check and recheck fluid level (approx. 45 min per unit).

Patent pending, our proprietary Pressure Regulator Valve design Provides: Stabilized, Fine-tuned regulation which shortens valve cycling for reduced bore wear (eliminates 20-60 PSI needle bounce on gauge) features Drop-in and GO™ design utilizes unworn part of bore for "NO~REAM"™ Installation. Includes Modified TC & cooler flow (especially at high PSI demand) re-calibrated TC limit and TCC Control for improved L/U, and increased Tow-haul capacity when hot. Universal EPC Relief prevents runaway line, case breakage and combats uncontrolled boost from pump cross-leaks.

PART# STL-5R110W

STL008 5R110W Internal Upgrade Kit



PART# STL008

The NEW STL008 features:
- Patent-pending Super-sized Direct Drum Bushing w/CT-101 coating
- State-of-the-art lube flow design, making it unique and non-obvious
